

Bee Pollen Granules

Bee Pollen Granules: We carry only whole dried granules. Because of this we have full confidence of the product being completely bee pollen. The granules are formed on bees' legs as they collect it from the flowers. When the bees enter their hive they pass thru a pollen screen which scrapes the pollen off of their legs. Beekeepers are careful to limit the use of the screens so that the bees have plenty of pollen to eat for themselves. Pollen is a complete food and along with a little honey provides the bees' total diet.

Purity: Bee Pollen Powder is typically a blend of Bee Pollen and Human Harvested Pollen powder. Many tablets are made from this blend. Human Harvested Pollen Powder does not have the nutritional benefits of Bee Pollen as the Bees impart enzymes into the pollen which changes the protein into free amino acids which are directly assimilated

by the human body. It is very important to watch labels closely. Many labels state they contain bee pollen (this could mean less than 1 % bee pollen) with the balance being human harvested pollen. People with allergies to pollen generally are not allergic to bee pollen.

Moisture: Our product is dried until it is very dry. Our Bee Pollen keeps better than high moisture Bee Pollen. Due to its low moisture levels - bacteria, molds and oxidation do not develop as they can in high moisture products typically sold elsewhere. High moisture product containing 10% more moisture should cost ten percent less in comparison to ours. Ours is dried at low temperatures to retain its full nutritional value.

Nutritional Benefits: Bee Pollen contains around 50% Protein much of which is in the form of free amino acids. It is also high in the B Complex Vitamins and enzymes.

Use: Bee Pollen Granules can be sprinkled on salads for added flavor. They have a slightly sweet taste and a strong flavor so are typically mixed with other foods. It is best to mix into foods after cooking as enzymes are destroyed by heat. Add to yogurt, smoothies, apple sauce, oatmeal (after cooking).
